

Recommendation Letter for Eric Cheung

24 Jun, 2022

To whom it may concern,

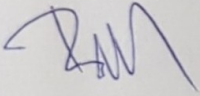

I am writing to recommend Mr Cheung Yuk Kwan, Eric, for your organization's senior software engineer position. Eric worked as senior software engineer for more than one year in Welend under my team, and he had helped to streamline the software process while delivered high quality development works for projects.

Eric is energetic and has strong technical knowledge. He is a good team-player and also able to work independently. During his work in Welend, he provided suggestions to improve the CICD process and to increase the efficiency of the team. Besides he also helped in system design for the software solution, so that the projects can be delivered successfully.

Therefore, I believe Eric is suitable for the post of senior software engineer in your company.

Please contact me at roy.ho@welab.co for any additional information.

Sincerely,

Roy Ho
Manager, Software Engineering
